

### In the Claims

This listing of claims replaces all prior versions, and listings, of claims in the application:

1. (Cancelled)
2. (Previously presented) A modular furniture system comprising:
  - a first module that encloses provided exercise equipment;
  - a second module that encloses provided computer equipment; and
  - at least one orifice in each module for passage of provided cabling between the modules,wherein at least one of the first and second modules comprises an interior wall that provides support for at least one shelf for supporting the respective equipment and defines a pocket for stowing a door, the door for enclosing the respective equipment within the at least one of first and second modules.
3. (Currently Amended) A modular furniture system comprising:
  - a first module that encloses provided exercise equipment;
  - a second module that encloses provided exercise equipment;
  - a [second] third module that encloses provided computer equipment; and
  - at least one orifice in each module for passage of provided cabling between the modules,wherein [there are two exercise] the first and second modules are each configured to house deployable exercise equipment [and one computer module], and further comprising a support for supporting a provided peripheral coupled to the provided computer equipment [in the computer module], wherein the support is located to position the provided peripheral to be viewable by a user located on [deployed] the provided exercise equipment [of] deployed from either [one of the two exercise] of the first and the second modules.
4. (Original) The modular furniture system according to claim 3, wherein the support comprises a pedestal table having a work surface.
5. (Cancelled)
6. (Cancelled)
7. (Cancelled)
8. (Cancelled)

9. (Currently Amended) The modular furniture system according to claim 2, wherein the at least one orifice in each module [includes at least one orifice] is in an interior portion [thereof, that] of its respective module and serves as a longitudinal cable passage.

10. (Currently Amended) A computer assisted exercise system comprising:

a workstation portion including computer equipment operative to perform [home/office] computing tasks; and

a workout portion comprising [deployable] exercise equipment that may be deployed, and a computer peripheral coupled to the computer equipment [of the workstation portion] by a link; wherein the workstation portion and workout portion are housed in at least one enclosure, the at least one enclosure having doors that in a first position, obscure the computer equipment and the exercise equipment from view, and in a second position, facilitate use of the [deployable] exercise equipment when deployed.

11. (Original) The computer assisted exercise system according to claim 10, wherein the workstation portion and the workout portion are housed in separate enclosures having respective cabling passages for the link.

12. (Original) The computer assisted exercise system according to claim 10, wherein there are two enclosures and a support surface that supports a provided monitoring device.

13. (Original) The computer assisted exercise system according to claim 12, wherein the two enclosures are positioned back to back, and wherein the support surface extends from a side thereof.

14. (Original) The computer assisted exercise system according to claim 10, wherein there are at least two enclosures each having a base with at least one opening therein to facilitate cabling between enclosures.

15. (Original) The computer assisted exercise system according to claim 14, wherein each enclosure further comprises an internal opening to facilitate cabling inside the enclosure.

16. (Currently Amended) The computer assisted exercise system according to claim 10, wherein both the workstation and workout portions include video monitors, at least one of which includes a [graphic] graphical user interface.

17. (Original) The computer assisted exercise system according to claim 15, wherein the at least one enclosure includes a plurality of shelves and a plurality of barbell rails disposed therein.
18. (Original) The computer assisted exercise system according to claim 16, further comprising a video camera for monitoring an exercise routine disposed in the at least one enclosure.
19. (Cancelled)
20. (Cancelled)
